

QUEEN'S UNIVERSITY

APPLICATION REQUIREMENTS FOR A GRADUATE EDUCATION IN PHYSICAL THERAPY

HOW TO USE THIS RESOURCE

Greetings!

Welcome to the Professional Program Prerequisite Project resource for Physical Therapy. We are a team of five students in the Bachelor of Health Science program who set out to research and compile application requirements for all health-related graduate programs across Canada.

As undergraduate students who are pre-med and pre-dent ourselves, we know how overwhelming and frustrating it can be to research application requirements for so many graduate programs, especially when the vast amount of information changes from year to year. Therefore, we did the hard work of doing the research for you, so you don't have to! You can treat this resource as your one-stop shop and launchpad for your graduate school application process.

This is the resource we wish we had when we were applying to graduate schools!

One thing we think you're going to find very valuable from this resource is the information about which Queen's Health Sciences and Arts and Sciences courses satisfy the prerequisite requirement for these schools. This is a unique and exclusive perk for our Queen's students.

In this document, you will find up-to-date, accurate information for the various Canadian graduate programs, last updated (January 3rd, 2024). To navigate through the document, you can simply Ctrl + F or Command + F for keywords to find what you're looking for.

We are still in the development stages of the project, and we welcome collaboration from Queen's students to help make this project the best it can be. If you have any proposed edits or any changes you'd like to make, please fill out our contact form. We hope you find this resource helpful. Happy applying!

Sincerely,

The 4P Team

Professional Program
Prerequisite Project

GLOSSARY

CASPer:

An online, open-response computerized situational judgment test composed of 12 sections. Each section contains a video-based or written scenario and three open-ended questions. Test takers have five minutes to respond to all three questions and 60-90 minutes to complete the entire test (optional 10-minute break). The test assesses skills like collaboration, communication, empathy, equity, ethics, motivation, problem solving, professionalism, resilience, and self-awareness.

Credit Hours

Measured in credit units.

Credit Units (CU)

A credit unit is given to a student upon completion of a course of study. At Queen's, a one semester course yields 3 CU, while a two semester, or full-year course yields 6 CU.

Cumulative GPA (cGPA)

An average of averages, combining all semester GPAs into a single, overall GPA.

Resource: [Cumulative GPA Calculator](#)

Full Course Load

A full course load is defined as 5 courses or the equivalent of 15 CU taken for one semester, and 10 courses, or 30 CU, taken for one full year of study.

Modified Personal Interview

A series of semi-structured and open-ended brief interviews with a one-on-one interaction with a single interviewer. The questions are asked in a similar style to a panel interview, but the format more closely aligns with a multiple-mini-interview. The interviewer is free to ask unprompted questions. Each "interview station" focuses on one of the following categories:

- Getting to know the applicant and their achievements
- Assessing an applicant's ability to evaluate an ethical dilemma
- Applicants engage in self-reflection about past experiences

Multiple Mini Interview

A series of short interview stations in which the candidate is asked a question or given a scenario before entering a room. The candidate has a limited time to both prepare their answer and deliver the answer to the interviewer. The number of stations vary. Candidates are assessed on non-cognitive qualities such as cultural sensitivity, maturity, teamwork, empathy, reliability, and communication skills.

Panel Interview

Typical interview style with multiple interviewers and multiple questions.

Weighted GPA (wGPA)

- A weighted GPA is calculated after adding extra points for any honors or Advanced Placement courses. For example: a letter grade of “A” in courses such as these would receive 5 points rather than 4, while a letter grade of “B” would receive 4 points rather than 3. In this calculation the overall GPA can exceed 4.0.
